

2.5 V / 3.3 V Dual 2:1 Differential Clock / Data Multiplexer with LVPECL Outputs

Multi-Level Inputs w/ Internal Termination

NB6L56

The NB6L56 is a high performance Dual 2-to-1 Differential Clock or Data multiplexer. The differential inputs incorporate internal 50 Ω termination resistors that are accessed through the VT pin. This feature allows the NB6L56 to accept various Differential logic level standards, such as LVPECL, CML or LVDS. Outputs are 800 mV LVPECL signals. For interface options see Figures 12 – 15.

The NB6L56 produces minimal Clock or Data jitter operating up to 2.5 GHz or 2.5 Gbps, respectively. As such, the NB6L56 is ideal for SONET, GigE, Fiber Channel, Backplane and other Clock/Data distribution applications.

The NB6L56 is offered in a low profile 5 mm x 5 mm 32-pin QFN package and is a member of the ECLinPS MAX™ family of high performance Clock / Data products. Application notes, models, and support documentation are available at www.onsemi.com.
