

ON Semiconductor Compliance with REACH

REACH is a new European Community Regulation on chemicals and their safe use ([EC 1907/2006](#)). It deals with the **R**egistration, **E**valuation, **A**uthorization and **R**estriction of **C**hemical substances. The new law entered into force on 1 June 2007 and will be phased in until 2018.

ON Semiconductor supports the basic aim of REACH in improving the protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances. ON Semiconductor meets all applicable REACH requirements and is committed to provide our customers with information about substances in its products as required.

Under REACH, registration provision is applicable to manufacture or import of chemicals and does not apply to ON Semiconductor's EU semiconductor manufacturing operations. It is anticipated that substances used in electronic products will be registered by raw material manufacturers within the supply chain.

ON Semiconductor's products are "articles" as defined in REACH Article 3(3) and do not release substances under their normal use. Suppliers of articles must provide recipients with information on Substances of Very High Concern (SVHC) if those are present above a concentration limit of 0.1 % on an article level. ON Semiconductor products do not contain any of the currently listed SVHCs. ON Semiconductor will continue to monitor SVHC Candidate List as it gets revised and will provide all required and current information in material composition declarations available at <http://www.onsemi.com/PowerSolutions/MaterialComposition.do>

ON Semiconductor assures its customers of full compliance with REACH for its products.
