

## 製品概要

## XGS 30000: CMOS Image Sensor, 29.8 Mp, Global Shutter

技術情報は、データシートをご参照ください。

The XGS 30000 is a 29.8 Mp (5460 x 5460) CMOS image sensor in APS-C optical format with 1:1 (square) aspect ratio, supporting up to 48 frame per second readout with 12-bit output at full resolution.

The device provides high resolution, global shutter imaging with high readout speed and a low power footprint for industrial imaging customers. Two speed grades are available to match device output to key computer interfaces and application requirements.

The XGS 30000 shares a common design and footprint with other members of the XGS family, such as the XGS 20000 or XGS 45000, allowing one camera design to support multiple resolutions to simplify and speed time to market for new camera designs.

The XGS 30000 is available in a 251-pin ◆PGA package in both monochrome and Bayer color configurations.
