

Industrial Relay Replacement & Motor Protection

Innovation

Showcasing [eFuse](#) as replacement of traditional fuses as well as relays for industrial automation applications with inbuilt overcurrent, overvoltage, inrush current, over temperature protection for both faults and predictive maintenance. Control and diagnostic features permit easy integration into larger automated systems.

Value Proposition

All the protection features along with programmability as well as fault reporting capability ensures unconditional safety with no SOA concerns.

- ✓ Unconditional safety
- ✓ Programmability
- ✓ Fault reporting and diagnostics
- ✓ Easy installation
- ✓ Small footprint
